Art Unit: 2833

wherein the bullet-shape member is insert through a second mounting of the second circuit board; and

6. A board holddown assembly comprising:

a board holddown including:

an elastomeric support member defining spaced circumferential first mounting portion and second mounting portion connected by an axial intermediate portion;

a neck extending from the second mounting portion away from the first mounting portion;

a plastic bullet-shape member [attached] integrally formed to the neck and defining a radial extending latch around an upper portion thereof within a range of angle;

a first type printed circuit board snugly sandwiched between the first mounting portion and the second mounting portion; and

a second type printed circuit board snugly sandwiched between the second mounting portion and the latch; wherein
